Surface Water Drainage System
&
Sanitary Accessories.

FLOOR DRAIN

PVC + Floor Drain

It consists of PVC body, Inner Siphon and is provided with stainless steel grating.

Adjustable Trapped Floor Drain With Side Outlet.

It consists of a body made of Poly Polyester, Baffle Plate, Revolving Frame and a Square Grate made of PP or SS.

FLOOR DRAIN

Trapped Floor Drain With Vertical Outlet
and Inner Joint.

It consists of a body made of Poly
Polyester and a Trapped Grate.

Balcony Floor Drains.

Made of PVC. It consists of a Semi
Circular Body which ends in angle, an
inner part which joins the upper inlet
forming a siphon & a removable grate.

FRAME, GRATE AND COVER

These are made of PP. They are reinforced cover and grate that have a retaining structure which ensures strength and durability.

They are perfect fit for any type of flooring.

MONOLITHIC CATCH PIT

It consists of a body made of Poly Polyester and it is used as a basement for water to be stored .

SHOWER CHANNEL GRATE

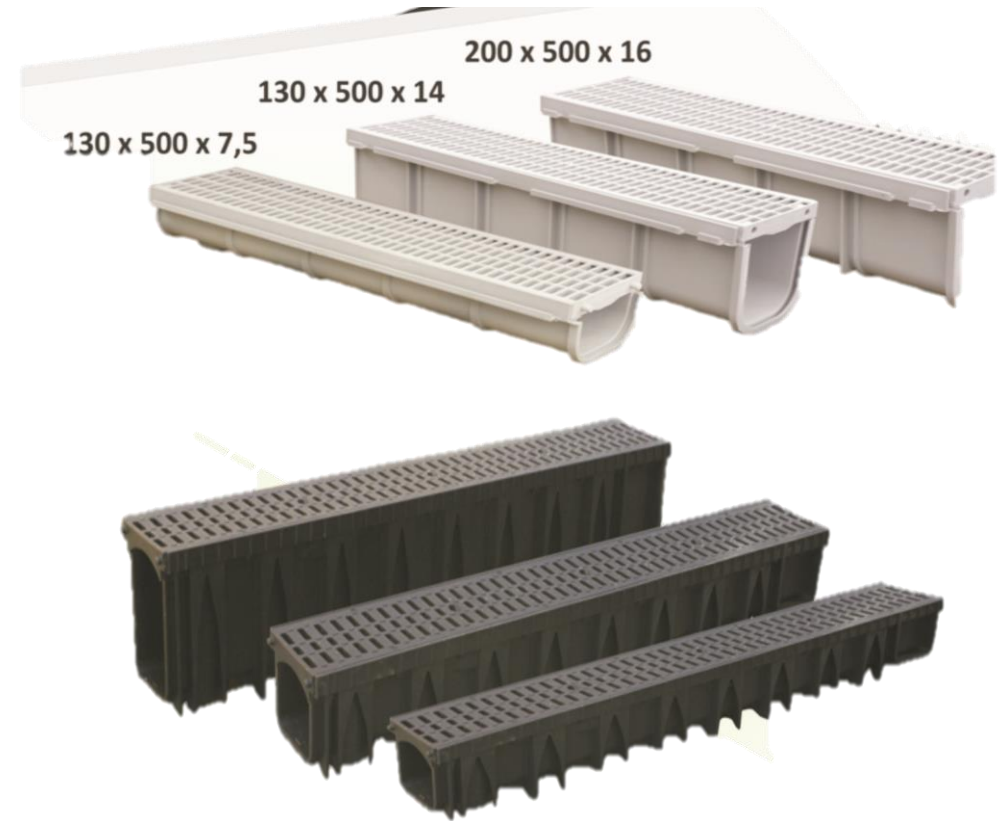

This is the most comfortable, efficient and elegant way to solve ater canalization in tiled showers, gyms, changing rooms etc. Available in PP and SS

MODULAR CHANNEL

The Modular Channel is made of Poly Polyester and PVC materials.

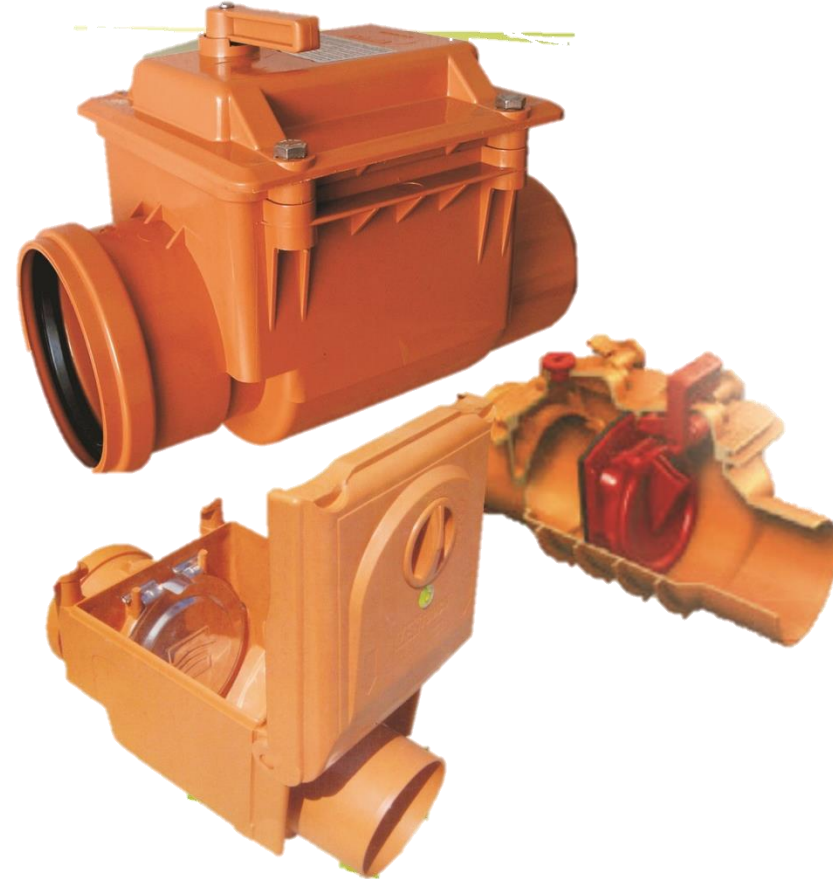

It is effective where constant drainage of water is required. (e.g. Swimming Pool Edge, Garage Doors, Fence, Sport Facilities).

NON RETURN VALVE

This is a one way flow system. It prevents inconvenience due to sewage return, flooding or inundations in basement, garages and building exposed to such risk.

It also prevents rodents and dangerous animals from entering through the drainage system and protect against unpleasant odor.
